

Claim 1. (currently amended) A recording sheet for ink jet printing comprising a support having coated onto said support at least one ink receiving layer comprising one or more binders and a mixture of different water insoluble, (i) inorganic oxides of the elements aluminium or silicium, (ii) oxide/hydroxides of the element aluminium or (iii) aluminium silicates, wherein at least one of said oxides, oxides/hydroxides or silicates has a pore volume of ≥ 40 ml/100 g and is present in an amount of at least 8 weight percent relative to the total amount of all the water insoluble, inorganic oxides, oxide/hydroxides or silicates; wherein the mixture contains primary particles; and wherein the primary particles of the mixture component with the largest volume have an equivalent sphere diameter of less than 20 nm; and the primary particles of the mixture component with the smallest volume have an equivalent sphere diameter that is at least $1/20$ of the equivalent sphere diameter of the primary particles of the mixture component with the largest volume.

6
[Claim 2. (cancelled)]

Claim 3. (original) A recording sheet according to claim 1 wherein at least one of said oxides, oxides/hydroxides or silicates with a pore volume of ≥ 40 ml / 100 g is present in an amount of at least 40 weight percent relative to the total amount of all the water insoluble, inorganic oxides, oxide/hydroxides or silicates.

Claim 4 (currently amended) A recording sheet according to claim 2 1 wherein the primary particles of the mixture component with the largest volume have an equivalent sphere diameter of less than 15 nm and the primary particles of the mixture component with the smallest volume have an equivalent sphere diameter that is at least $1/10$ of the equivalent sphere diameter of the primary particles of the mixture component with the largest volume.

Claim 5 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is of spherical shape and another one is of platelet shape.

Claim 6 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is of spherical shape and another one is of rod shape.

Claim 7 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is of spherical shape and another one is of fiber shape.

Claim 8 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is of platelet shape and another one is of fiber shape.

Claim 9 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is aluminium oxide/hydroxide and another one is γ - or δ -aluminium oxide.

Claim 10 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is aluminium oxide/hydroxide and another one is silicium dioxide.

Claim 11 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is γ - or δ -aluminium oxide and another one is silicium dioxide.

Claim 12 (original) A recording sheet according to claim 10 wherein the silicium dioxide is positively charged.

Claim 13 (original) ^{amended} A recording sheet according to claim 11 wherein the silicium dioxide is ~~positively~~ positively charged.

Claim 14 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is γ - or δ -aluminium oxide and another one is imogolite.

Claim 15 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is positively charged silicium dioxide and another one is imogolite.

Claim 16 (original) A recording sheet according to claim 1 wherein one of the components of the mixture is aluminium oxide/hydroxide and another one is imogolite.

Claim 17 (previously amended) A recording sheet according to claim 16 wherein the aluminium oxide/hydroxide contains one or more of the elements with atomic number 57 to 71 in a total amount of 0.04 to 4.2 mole percent relative to Al_2O_3 .

Claim 18 (original) A recording sheet according to claim 1 wherein the binder or binders are gelatin, polyvinyl alcohol, derivatives of polyvinyl alcohol, polyvinyl pyrrolidone or mixtures thereof.

Claim 19 (withdrawn)

Claim 20 (new) A recording sheet according to claim 9 wherein the aluminium oxide/hydroxide contains one or more of the elements with atomic number 57 to 71 in a total amount of 0.04 to 4.2 mole percent relative to Al_2O_3 .

Claim 21 (new) A recording sheet according to claim 10 wherein the aluminium oxide/hydroxide contains one or more of the elements with atomic number 57 to 71 in a total amount of 0.04 to 4.2 mole percent relative to Al_2O_3 .

Claim 22 (new) A recording sheet according to claim 12 wherein the aluminium oxide/hydroxide contains one or more of the elements with atomic number 57 to 71 in a total amount of 0.04 to 4.2 mole percent relative to Al_2O_3 .
